

M600 OS version 230 update notification

1. Bug fixing of OS 230:

- SIM manager function is included
SIM manager is mainly for SIM contact management, and can easy edit or copy SIM and contact information in M600.
SIM manager is located on start/programs/phone/SIM manager
- Fixed when receive SMS message SIM tool kit would sometime hang problem.
- Supporting Bluetooth DUN&DCN profile
The Dial-Up Networking (DUN) profile is needed to enable a mobile phone to be used as a modem for computers. As the result, PC can through M600 connect to Internet.

M600 OS 230 update notification:

Required files:

ETEN_M600_XXX_R22_100_0230.EXE (XXX mean different languages)

Special Notes

Due M600+ has different memory structure than M600, as the result, M600+ OS and M600 OS are not compatible each other. Please do not install M600+ OS on M600 or M600 OS on M600+, otherwise flash ROM would be damaged and not boot up anymore.

Normal operation items:

- Make sure use PC with XP system (better with service pack2) for OS updating.
- Disable all kind of firewall before OS updating.
- Be sure your PC or laptop already installed ActiveSync 4.0 or above version
- Be sure the USB cable is properly connected between PC and Cradle.
- Put M600 on cradle and be sure the ActiveSync is activated with GREEN sign.
- Please backup all necessary data on PC side before OS updating process.
- Be sure the power adapter is properly connection during the updating process.
