1. Safety Precautions

1-1. Repair Precaution

- Repair in Shield Box, during detailed tuning.
Take specially care of tuning or test,
because specipicty of cellular phone is sensitive for surrounding interference(RF noise).
- Be careful to use a kind of magnetic object or tool,
because performance of parts is damaged by the influence of manetic force.
- Surely use a standard screwdriver when you disassemble this product,
otherwise screw will be worn away.
- Use a thicken twisted wire when you measure level.
A thicken twisted wire has low resistance, therefore error of measurement is few.
- Repair after separate Test Pack and Set because for short danger (for example an
overcurrent and furious flames of parts etc) when you repair board in condition of
connecting Test Pack and tuning on.
- Take specially care of soldering, because Land of PCB is small and weak in heat.
- Surely tune on/off while using AC power plug, because a repair of battery charger is
dangerous when tuning ON/OFF PBA and Connector after disassembling charger.
- Don't use as you pleases after change other material than replacement registered on SEC
System.
Otherwise engineer in charge isn't charged with problem that you don't keep this rules.

1-2. ESD(Electrostatically Sensitive Devices) Precaution

Several semiconductor may be damaged easily by static electricity. Such parts are called by ESD(Electrostatically Sensitive Devices), for example IC,BGA chip etc. Read Precaution below. You can prevent from ESD damage by static electricity.

- Remove static electricity remained your body before you touch semiconductor or parts with semiconductor. There are ways that you touch an earthed place or wear static electricity prevention string on wrist.
- Use earthed soldering steel when you connect or disconnect ESD.
- Use soldering removing tool to break static electricity. , otherwise ESD will be damaged by static electricity.
- Don't unpack until you set up ESD on product. Because most of ESD are packed by box and aluminum plate to have conductive power,they are prevented from static electricity.
- You must maintain electric contact between ESD and place due to be set up until ESD is connected completely to the proper place or a circuit board.

2. Specification

2-1. GSM/DCS1800/PCS1900/WCDMA2100 General Specification

	EGSM 900 Phase 2	DCS1800 Phase 1	PCS1900	WCDMA
Freq. Band[MHz] Uplink/Downlink	880~915 925~960	1710~1785 1805~1880	1850~1910 1930~1990	1920~1980 2110~2170

3. Product Function

Main Function

- 3G
- RSS reader
- Camera and camcorder
- Synchronisation with Windows Media Player
- Music player
- FM radio
- Image editor
- Digital data printing
- Bluetooth
- File viewer
- Web browser

4. Array course control

Test Jig (GH80-03308A)

Test Cable (GH39-00890A)

RF Test Cable (GH39-00397A)

Software Downloading

Download Firmware Files

- SGH-G800 firmware is composed of 4 files

File	Contents
amss_compressed.bin	Modem binary for communication function & Mocha binary for user interface and various application
Rsrc_G800_XXX*.rc1	Files need for each application
Rsrc2_G800(Mid/Low).rc2	Power on/off animation
FactoryFs_G800_XXX.bin	Default file system to be put into the initial production

*XXX means operator name usually.

- Download program (MultiLoader V5.xx.exe)
 - S/W for downloading firmware to the SGH-G800
 - No need to install the S/W. Just unzip the compressed file or copy it.
 - After copying one file, possible to download firmware to the mobile
 - Maximum 8 mobiles can be downloaded at the same time
(For this, usually USB hub is needed)

- **Prerequisite**

1. Get the **download program** and **Samsung USB modem driver**.
 - <http://www.anysvcmobile.com>
2. Install the Samsung USB modem driver
 - The previous section may be helpful for you.
3. Unzip MultiLoader.zip to the folder which you would like to locate the executable file.
 - No need to install it.
 - Get the **firmware** to download from service web site.
 - <http://www.anysvcmobile.com>
4. Unzip the firmware file to some specific folder which you want.
5. Prepare one **USB data cable** for SGH-G800

- **HowToDo**

1. Prepare 4 files which are explained before this procedure.
2. Execute the download SW, MultiLoader.exe.
3. Boot the SGH-G800 by pressing '**Power ON key**' + '**Number 9 key**' at the same time - If you do properly, you can see the **Red Screen** on the LCD
4. Connect the data cable to the SGH-G800
 - Check whether one of Entry is highlighted in MultiLoader.
 - If you want to download more UEs, you only have to connect them.
5. Choose each firmware file matched to each item of MultiLoader.
 - ★ **Be sure to choose the correct MSM chip(SGH-G800 : MSM6280)**
6. Now **press the button 'Download'**.
7. When downloading is complete, UE reboot automatically.
 - If there is different in FactoryFS.bin, UE will format file system automatically.

• Things to remember

- Only when it is informed that boot code change is necessary, use the check box “Boot Change” in Multiloader program.
 > In most of cases, it is recommended not to use them.
 > **If downloading fails during changing boot area, you can not reboot the mobile any more !**
- When you select the binary files for each item, don't forget to check that the files have the same version.
- File system will be formatted only when FactoryFS.bin file changed. At this time, all data which is made or stored by user will be removed.
- The Multiloader version should be matched to the firmware version. Please check whether the versions are matched.

Download Firmware Files practice

• Prerequisite

1. Get **download program** and **firmware** from service web site.
2. Prepare one **USB data cable** for SGH-G800.
3. Making connection between PC(it has already been installed USB driver) and SGH-G800.

- Execute "MultiLoader.exe".

- Execute "MultiLoader.exe" and choose like the following.

Key Strings to remember

- Debug Screen :

- ***#0011#** →

- IMEI number check :

- ***#06#**

- Vibrator :

- ***#0842#**

- SW version check :

- ***#1234#**

- Admin :

- ***#6984125*#**

- Battery Information :

- ***#0228#** →

- **Reset(Initialize) Mobile's Settings.**

- Functions

- Initialize EEPROM section in phone.

delete SMS, MMS, multimedia files, remove phone lock...etc..

- Press **"*2767*3855#" (full)**

- After press those key stings, **wait** for the Mobile to power off and power on automatically. ([Never power off for 1 minute by force after power on.](#))

- The downloaded files (sounds, Image, video, etc..) are not deleted by this reset.

Key Strings to remember

- Debug Screen :
 - ***#0011#** →
- IMEI number check :
 - ***#06#**
- Vibrator :
 - ***#0842#**
- SW version check :
 - ***#1234#**
- Admin :
 - ***#6984125*#**
- Battery Information :

Please consult the GSPN website (Samsung Portal) for the most recent version of the product's part list.

7. Disassembly and Assembly Instructions

7-1. Disassembly

1

1) Unscrew 4 points from the rear case.

※ caution

1) Be careful not to make scratch and molding damage!

2

1) Lift up sides of Rear using Assembly stick and disjoint it.

※ caution

1) Be careful not to make scratch and molding damage!

3

1) Unscrew 1 point from the camera module.

※ caution

1) Be careful not to make scratch and molding damage!

4

1) Disconnect Camera module FPCB connector.

2) Disjoint Camera module from the front case.

※ caution

1) Be careful not to make scratch and molding damage!

5

- 1) Remove the anelectric tape at the speaker module connector.
 - 2) Disconnect speaker module FPCB connector.
- ※ **caution**
- 1) Be careful not to make scratch and molding damage!
 - 2) Be careful of damage to the FPCB.

6

- 1) Unhook speaker module from the fFront case.
- ※ **caution**
- 1) Be careful not to make scratch and molding damage!

7

- 1) Remove volume key FPCB from Front Rib.
 - 2) Remove camera key FPCB from Front Rib.
- ※ **caution**
- 1) Be careful not to make scratch and molding damage!

8

- 1) Disjoints MICRO SD cover.
 - 2) Disjoints I/F cover.
- ※ **caution**
- 1) Be careful not to make scratch and molding damage!

9

1) Disconnect slide FPCB connector from PBA.

※ **caution**

1) Be careful not to make scratch and molding damage!

2) Be careful of damage to the FPCB.

10

1) Unscrew 6 points from Front case and then disjoint the Front case.

※ **caution**

1) Be careful not to make scratch and molding damage!

11

1) Unscrew 2 points from the Lower.

※ **caution**

1) Be careful not to make scratch and molding damage!

12

1) Lift up sides of Lower and disjoint it.

※ **caution**

1) Be careful not to make scratch and molding damage!

13

1) 1)Remove an electric tape on the back of LCD.

※ caution

1) Be careful not to make scratch and molding damage!

2) Be careful of damage to the FPCB.

14

1)Remove LCD ASS'Y from the upper.

※ caution

1) Be careful not to make scratch and molding damage!

7-2. Assembly

1

- 1) Insert Slide FPCB into connector.
- 2) Solder the side pads of Slide FPCB.

※ caution

- 1) Be careful not to make scratch and molding the!
- 2) Be careful of damage to the FPCB.

2

- 1) Attach Slide FPCB on the back of LCD..

※ caution

- 1) Be careful not to make scratch and molding damage!
- 2) When attaching check the guideline.

3

- 1) Insert VGA FPCB into connector.
- 2) Attach VGA FPCB on the back of LCD.

※ caution

- 1) Be careful not to make scratch and molding damage!
- 2) Be careful of damage to the FPCB.

4

- 1) Let the Sub keypad be on the UPPER

※ caution

- 1) Be careful not to make scratch and molding damage!

5

1) Let the LCD ASS'Y be on the Upper.

※ caution

1) Be careful not to make scratch and molding damage!

2) Be careful of damage to the FPCB.

6

1) Attach an electric tape on the back of LCD.

※ caution

1) When attaching, check the guideline.

7

1) Assemble from the upper to the lower side of Lower.

※ caution

1) Be careful not to make scratch and molding damage!

2) Lock the hooker of upper side Lower perfectly.

8

1) Screw 2 points on the Lower

※ caution

1) Be careful not to make scratch and molding damage!

2) Check the TORQUE(1.0~ 1.2 Kgf.Cm)

9

1) After assemble the Front, screw 6 points on the Front.

※ **caution**

1) Be careful not to make scratch and molding damage!

2) Check the TORQUE(1.0~ 1.2 Kgf.Cm)

10

1) Let main keypad be on the Front.

※ **caution**

1) Be careful not to make scratch and molding damage!

11

1) Connect Slide FPCB to PBA.

※ **caution**

1) Be careful not to make scratch and molding damage!

2) Be careful to connect Slide FPCB perfectly.

12

1) Let the PBA be on the Front.

2) Insert mic into Front hole.

※ **caution**

1) Be careful not to make scratch and molding damage!

13

- 1) Attach volume key FPCB on the Front rib.
- 2) Attach camera key FPCB on the Front rib.

※ **caution**

- 1) Be careful not to make scratch and molding damage!.

14

- 1) Insert MICRO SD COVER into Front rib hole.

- 2) Insert I/F COVER into Front rib hole.

※ **caution**

- 1) Be careful not to make scratch and molding damage!

15

- 1) Join Speaker module to the Front.

※ **caution**

- 1) Be careful not to make scratch and molding damage!

16

- 1) Insert speaker module FPCB into connector.

- 2) Attach the anelectric tape for loose-pervention.

※ **caution**

- 1) Be careful not to make scratch and molding damage!
- 2) When attaching, check the red line at the picture.

17

- 1) Assemble camera module to into the Front.
 - 2) Connect Camera FPCB on the PBA.
- ※ **caution**
- 1) Be careful not to make scratch and molding damage!.

18

- 1) Screw 1 point of camera module.
- ※ **caution**
- 1) Be careful not to make scratch and molding damage!
 - 2) Check the TORQE(1.0~ 1.2 Kgf.Cm)

19

- 1) Assemble the Rear case.
- ※ **caution**
- 1) Be careful not to make scratch and molding damage!

20

- 1) Screw 4 points of Rear.
- ※ **caution**
- 1) Be careful not to make scratch and molding damage!
 - 2) Check the TORQE(1.0~ 1.2 Kgf.Cm)

11-1. Reference Abbreviate

AAC: Advanced Audio Coding.

AVC : Advanced Video Coding.

BER : Bit Error Rate

BPSK: Binary Phase Shift Keying

CA : Conditional Access

CDM : Code Division Multiplexing

C/I : Carrier to Interference

DMB : Digital Multimedia Broadcasting

EN : European Standard

ES : Elementary Stream

ETSI: European Telecommunications Standards Institute

MPEG: Moving Picture Experts Group

PN : Pseudo-random Noise

PS : Pilot Symbol

QPSK: Quadrature Phase Shift Keying

RS : Reed-Solomon

SI : Service Information

TDM : Time Division Multiplexing

TS : Transport Stream
