1. Safety Precautions

1-1. Repair Precaution

- Repair in Shield Box, during detailed tuning.
Take specially care of tuning or test, because the specification of cellular phone is sensitive for surrounding interference(RF noise).
- Be careful to use a kind of magnetic object or tool, because performance of parts is damaged by the influence of magnetic force.
- Surely use a standard screwdriver when you disassemble this product, otherwise screw will be worn away.
- Use a thicken twisted wire when you measure level.
A thicken twisted wire has low resistance, therefore error of measurement is few.
- Repair after separate Test Pack and Set because for short danger (for example an overcurrent and furious flames of parts etc) when you repair board in condition of connecting Test Pack and tuning on.
- Take specially care of soldering, because Land of PCB is small and weak in heat.
- Surely tune on/off while using AC power plug, because a repair of battery charger is dangerous when tuning ON/OFF PBA and Connector after disassembling charger.
- Don't use as you pleases after change other material than replacement registered on SEC System.
Otherwise engineer in charge isn't charged with problem that you don't keep this rules.

1-2. ESD(Electrostatically Sensitive Devices) Precaution

Several semiconductor may be damaged easily by static electricity. Such parts are called by ESD (Electrostatically Sensitive Devices), for example IC,BGA chip etc. Read Precaution below.

You can prevent from ESD damage by static electricity.

- Remove static electricity remained your body before you touch semiconductor or parts with semiconductor. There are ways that you touch an earthed place or wear static electricity prevention string on wrist.
- Use earthed soldering steel when you connect or disconnect ESD.
- Use soldering removing tool to break static electricity. , otherwise ESD will be damaged by static electricity.
- Don't unpack until you set up ESD on product. Because most of ESD are packed by box and aluminum plate to have conductive power,they are prevented from static electricity.
- You must maintain electric contact between ESD and place due to be set up until ESD is connected completely to the proper place or a circuit board.

2. Specification

2-1. GSM General Specification

	EGSM 900	DCS1800	PCS1900	W-CDMA
Freq. Band[MHz] Uplink/Downlink	880~915 925~960	1710~1785 1805~1880	1850~1910 1930~1990	1920~1980 2110~2170
ARFCN range	0~124 & 975~1023	512~885	512~810	UL:9612~9888 DL:10562~10838

19	5±3 dBm	14	2±5 dBm	14	2±5 dBm
		15	0±5 dBm	15	0±5 dBm

3. Product Function

Main Function

- Quad band(900/1800/1900/2100MHz)
- 1.3 Mega Camera
- Image editor
- MP3 player
- Phonebook
- Name card
- Multimedia Message Service (MMS) / Video Message
- E-mail
- Voice recorder
- Bluetooth
- Get personal with photo caller ID
- Web browser
- WAP2.0 / Java2.0
- Calender
- H263. MPEG4

4. Array course control

4-1. Software Adjustments

1. JIG: Download, Trace, Calibration, etc (GH80-003308A)
2. RF test cable: RF test (GH39-00397A)
3. Test cable: JIG to phone (GH39-00478A)
4. TA (Travel Adaptor) (GH44-01207A)
5. Data Link Cable : USB cable (GH39-00444A)
6. Serial cable: PC to JIG

4-2. Software Downloading

4-2-1. Downloading Binary Files

- Four binary files for downloading Z240.
 - VMSZCR.bin : Modem binary for communication function
 & Mocha binary for user interface and various application
 - Rsrc_Z240_Generic.rc1: Files need for each application
 - Rsrc2_Z240(Mid).rc2 : Power on/off animation
 - FactoryFs_A701_Telstra.ffs : Default file system to be put into in initial production

4-2-2. Pre-requisite for Downloading

- Downloader Program([FastMultiLoader V3.30.exe](#))
- SGH-Z240 Mobile Phone
- USB Data Link Cable
- Binary files

4-2-3. S/W Downloader Program

1. Boot the Z240 by pressing 'Power ON key'
2. Load the binary download program by executing the "[FastMultiLoader V3.30.exe](#)".

3. Select the check box what you want to download.

4. Select the binary file what you want to download

5. Now press the button 'Port Search'.

6. Now press the button 'DownLoad'.

7. When downloading is complete, UE reboot automatically.

- If there is difference in FactoryFs.bin, UE will format file system automatically.

5. Exploded View/Disassembly&Assembly Instructions

5-1. Cellular phone Exploded View

5-2. Cellular phone Parts list

5-3. Disassembly and Assembly Instructions

— Disassembly

1

1) Unscrew 6 Points

1)When you unscrew it, please be cautious not to damage to the REAR COVER.

2

1) Detach the REAR cover using the "Disassembler" upside first and downside last.

1)When you detach the COVER, please be cautious not to damage to the REAR COVER.

3

1) Pull out 3*4 key connector.
2) Pull out LCD connector.
3) Lift up the ANTENNA WIRE with tweezers.

1) Please be careful not to damage the F-PCB of 3*4 KEY CONNECTOR, LCD connector.
2) Please be careful not to bend the ANTENNA WIRE tip.

4

1) Lift up bottom of the antenna with tweezers.

1) Please be careful not to damage the ANTENNA.

5

1) Push the tip of the hinge inside the guide hole with tweezers.

1) Please be careful not to damage the Front.

6

1) Take off 2 SCREW CAPS with tweezers.
2) Unscrew 2 POINTS.

1) Please be careful not to damage the Folder Lower.

7

1) Detach the Folder Upper cover using the "Disassembler" upside first and 4 side points last.

1) Unlock the Red Circle Area.
2) Please be careful not to damage the Folder Lower/Folder Upper.

8

1)Take off ① Conn Insu TAPE with tweezers.
(Open up the Actuator and detach the F-PCB.)

9

2)Open up the Actuator and detach the CAM
connector F-PCB.
3)Detach SPKs, MOT, RCV by soldering.

1) Please be careful not to damage the VGA CAMERA.

2) Please be careful not to damage the CAMERA FPCB.

3) Please Use tweezers when separating the LCD FPCB from the LCD module preventing scratching the surface of the F-PCB.

— Assembly

1

1) Solder SPKs, MOT, RCV as below.

2

1) Insert the Con-to-con into the connector and push the Actuator to fix the F-PCB.
Attach the INSU TAPE.

2) Insert the CAM module as below.

①

②

1) Bond the part of Soldering SPKs, MOT, RCV with the yellow glue.

1) Please be careful not to damage the F-PCB

3

1) Put the LCD Ass'y into the Folder LOWER.

①

4

1) Attach 4 EMI TAPES and 4 gaskets as below.

1) Please be careful not to damage the Folder Lower.
2) Please be careful not to damage the CAMERA module.

1) Attach them in the right position on the silk marks in the LCD PCB.

5

- 1) Hook the UPPER case on the Folder LOWER.
- 2) Push 4 points to be hooked firmly.

1) Push the hook along the red colored direction arrow.

6

- 1) Screw 2 points.
- 2) Attach 2 SCREW CAPs as below.

1) Please be careful not to damage the Folder Lower.

7

- 1) Combine the Folder Ass'y to Front Ass'y with Folder assembling Jig.

1) Please be careful not to damage the CASEs.

8

- 1) Assemble the CHANGEABLE COVER as below.

1) Please be careful not to damage the CASEs.

9

- 1) Plug the INTENNA Cable to the INTENNA as below.
- 2) Assemble the INTENNA, the INTENNA WIRE to the FRONT CASE.

①

②

1) Please be careful not to damage the INTENNA WIRE.

10

- 1) Push the left side first and then right side of the PBA to be hooked on the LOCKER.

1) Please be careful not to damage the PBA.

11

- 1) Mate the 2 connectors as below (3*4 KEY, LCD FPCB CONNECTOR).(Check the EMI gasket on the LCD CONNECTOR)
- 2) Mate the INTENNA WIRE.

1) Please be careful not to damage the PBA.

12

- 1) Assemble the REAR COVER bottom side first as below.

1) Please be careful not to damage the CASEs.

13

1) Screw 6 POINTs.

1) Please be careful not to damage the CASEs.
