Main LCD

1. Icon area

	Display the current CDMA network signal strength. The more bars show, the stronger the signal is. When there is no network signal available, it displays×.
	Indicate that the phone is in call or a call is incoming. Or indicate that data connection is activated for data services.
	Indicate that there are unread messages.
	Indicate that your phone is in General mode.
	Indicate that your phone is in mut mode.
	Indicate that your phone is in meeting mode.
	Indicate that your phone is in outdoor mode.
	Indicate that message box is full.

	Indicate that your phone has been locked.
	Indicate that your keyboard has been locked.
	Indicate that your phone is in roaming state.
	Indicate that alarm clock has been set.
	Indicate that earphone has been inserted.
	Indicate that the FM has been running.
	Indicate the current battery volume level.

Note:

Roam Indicate only displays in international roaming state.

2. Date and time

Time is setting . You can set Time in System setting →Display Settings.

3. Soft Key Labels

Display the corresponding functions for **Left/Right** Soft key and **OK** key.

The Idle Display is the standard display that you see when you are not on a call or using the menu.

Installing the card

Your phone must work with an card provided by your service provider. Your card contains all your subscription information.

1. Insert card in with the metal contacts facing down and the cut corner aligned with that of the compartment.
2. Install the battery .

Note:

- 1、 If no card is installed, or there are errors in the installation, or your card is damaged, then your phone's LCD will display "Insert card" when it's powered on.
- 2、 If your card is locked, your phone will display "unlock PIN". Please contact your network service provider.
- 3、 When installing card, please keep it away from possible damage caused by static, scratch and bend, and put it where is not available for children.

Installing the Battery

You must install and charge the battery to use your phone. Insert the ridge at the side of the battery into the base of the phone, then push the battery down and snap it into place.

Note:

Your phone is designed to be used only with Original batteries and chargers. Use of other batteries or charger may cause damage to your phone and void the warranty.

Charging the Battery

New batteries are shipped partially charged. Before you can use your phone, you need to charge the battery, as indicated by the following instructions. Some batteries perform best after several full charge/discharge cycles.

1. Connect charging line and charging base . Plug the charger into your phone's connector port with the arrow facing up.
2. Plug the other end of the charger into the appropriate electrical outlet (100~230VAC). The phone's status lamp will light red during charge.

3. When your phone indicates that the battery is fully charged, press the release tab and remove the travel charger.

Note:

1. Before charge, make sure the battery is installed in the phone.
2. The battery can discharge gradually even when your phone is powered off. If the battery is drained for a long time, the information stored in the phone could possibly be lost. So even you don't need to use your phone for a long period, you should charge the battery some times to keep it away from drained.
3. If the status lamp flashes in red, please remove your travel charger and insert it again. If this makes no effect, stop charge and send the charger for repair.
4. If the battery's charge is extremely low, the sub LCD may not light even when charge has begun. After a period of charge then the LCD can light.

Removing the Battery

Make sure your phone is powered off so that you don't lose any unsaved information.

Push down the battery release latch and lift the battery off the phone.

Battery Level Indicator

Your Phone is equipped with a Lithium Ion (Li-Ion) battery which can be recharged before completely drained. The battery provides approx 2 hours of continuous talk time or approx 5 days of continuous standby time.

Battery Level Indicator changes according to the battery's charge volume as below:

	Full charge
	Partial charge
	Low charge
	Extremely low charge

If the charge continues to get low, the Indicator begins flashing. When the charge becomes drained, your phone gives an alert and the message of "Low battery" is displayed on the screen. Several minutes later your phone will alert again and then turn off automatically.

Battery performance

	850mAh (standard battery)
--	---------------------------

Standby time*	About 220 hours
Talking time*	About 180 minutes

- Local network conditions, phone's settings, game and music playing, data services and frequent operations can affect battery's standby time.
- The battery performance is also affected by charge state, temperature.

Basic functions

Turning Your Phone On and Off

1. Press and hold **Power** key for more than 3 seconds to turn on your phone.
2. If "Pin Code Check" (please refer to page xxx) is set on, the phone will prompt you to enter password. If only you input proper password (default as "1234"), the phone can enter idle display.
3. When a network is found, the phone will enter Idle Display, from which you can send calls and do other operations.
4. Press and hold Power Key for more than 2 seconds to turn off your phone.

Making a Call

Your Phone offers a variety of ways to make a call, including Speed Dialing and dial from Call Logs and phonebook.

Making a Call Using the Keypad

To make a call using the keypad from idle display:

1. Press **Numeric keys** to dial the phone number.
If you make a mistake, press **right soft** key to delete last digit.
If you want to dial extension number at one time, press and hold *** key** to input “P” and follow with extension number.
You can dial up to 32 digits at one time.
2. Press **Send key** to make the call.
For the extension number, you need to press **Send** key again.
3. To end the call, press **Power key**.

Making a Call Using Phonebook

To dial directly from a Phonebook record from idle display:

1. Press **Right Soft Key** to enter phonebook menu, select Search.
2. Now search by name. Input the first letter, or letters of the name you are looking for and press **OK**, then a list of records beginning with those letters are displayed.
Or you can choose to search by group by pressing **Right Soft Key**.
Or you can just press **OK** to view all records list and scroll through to find the record you want.
3. Enter the record to see detail. Select a phone number and press **Send key** to dial it.
If one record has more than one phone number

stored and you dial it directly, the first number is selected and dialed out.

4. To end the call, press or **End/Power**.

Making a Call with a Speed Dial

If you input one less than 2 digits (including 2) number and press **Send Key**, then the entry stored in this location is selected and dialed out.

Answering a Call

When you receive a call, your phone rings and/or vibrates and displays an incoming call message. At the same time it displays the using net service.

Press **Send Key** to answer the call.

If Any key answer set to **On**, you can answer the call by pressing any numeric key.

Press **Power key** to reject the incoming call.

Note : When you are talking using the phone and another phone are calling ,you can choose receive or reject it. If you receive it ,the formerly one will be auto-rejected.

Read a Message

When a new message is received, your phone will alert according to your settings and the message unread icon will be displayed. Press **Left Soft key** to read it.

Recent Calls

■ Dialed Calls

Press **Send** key to view dialed calls list from idle display.

Select the record you want with **Up/Down** keys and press **Send** key to dial it, or press **OK** key to view its detail.

■ Received Calls

Press **Left** key to view the received calls list from idle display. Press **Right** key to view the missed calls list from idle display. Press left/right key ,you can view CDMA received, GSM received and all received.

Select the record you want with **Up/Down** keys and press **Send** key to dial it, or press **OK** key to view its detail.

When viewing list of incoming/received/missed calls, press **Right Soft key** to pop up the submenu. You can do:

Select	You can select the number and view the particular.
Save	You can to save the number to phone RUIM or existing.
Set as black list	Add the current phone number to set call rejection or SMS rejection.
Send SMS	Enter message edit menu, and sent message to the current phone number.
IP dial	You can make a IP call.
Edit call	You can enter to edit the call.
Delete	Delete the current record.
Delete all	Delete all of the incoming calls, missed calls and outgoing calls records.

Entering Text

Multiple methods are provided making it easy for you to enter names, numbers, and messages on your phone.

Choosing a Text-Entry Method.

The input methods provided are:

1	pin	Enter Chinese characters by their PingYin.
2		
3	En	Let the phone predict each word as you enter it.
4	A	Enter capital letters.
5	a	Enter lowercase
6	1	Enter numbers only.

Whenever in a text-entry screen, press # key to selecting input method.

Press **1** key to enter punctuations and symbols in any text-entry method except number method. Use **Up/Down key** to scroll to other page, use **Left/Right** key to scroll in one line.

Using Tap Method

Press a number key one or more times to select a letter, number, or symbol shown in the following “Character Chart”.

Character Chart

Use this chart as a guide for entering letters, numbers with the tap method.

0	0
1	@, 1
2	a b c (or A B C) 2
3	d e f (or D E F) 3
4	g h i (or G H I) 4
5	j k l (or J K L) 5
6	m n o (or M N O) 6
7	p q r s (or P Q R S) 7
8	t u v (or T U V) 8
9	w x y z (or W X Y Z) 9

After a character is entered, the cursor stays at it. You can press **Right** Direction Key to move to the next space or you can enter a character not on the same key directly. Press * key to toggle between lowercase and uppercase. For example, to input “china”, press “2” three times, “4” twice, Right Key once, “4” three times, “6” twice, “2” once.

Using Predictive Text Entry Method

Predictive Text Entry lets you enter a word using one keypress per letter. This software analyzes the combination of letters you have entered using an intuitive word database, and creates a suitable word automatically.

Alternative words and letter combinations are shown at

the bottom of the display. The word choices are updated with each keypress. Press **Up/Down** key for other choices.

Press **Left/Right** key to highlight the word you want.

Press ***** key to change the words to initial character capitalized, all uppercase characters, or all lowercase characters.

Press **OK** key to enter the word at the cursor location. A space is automatically inserted after the word.

For example, to enter "Happy New Year!":

Press 4, 2, 7 twice, 9, then * key to capitalize "h", and then OK key to enter "Happy". Then press 6, 3, 9, * key and OK key for "New". Then press 9, 3, 2, 7 * key and OK for "Year". Then press Clear key to delete the last added space. Then press # key, Left key twice and OK key to enter "!".

Note:

The database of the predictive input software contains 20,000 most frequently used words. If the word you desired is not in the word choices, you can enter it by Tap Method.

Entering Numbers

Press corresponding numeric key to enter the desired number.

Text Entry Submenu

When entering texts, press Right Soft Key to pop up the submenu, you can do:

Press **Right Soft Key** to display submenu, press “3” to enter paste mode. Use **Left/Right** Direction Keys to move to the position you want to paste the copied texts and press **OK** to paste them.

1.OK	Select the Send mode, and you can choose the Priority.
2. Copy	Use Left/Right Keys to move the cursor to the start of the texts you want to copy and press OK key to confirm it. Then move the cursor to select the texts, which are highlighted in gray. Press OK key at the end of the texts. The selected texts are copied to clipboard.

4. Cut	Use Left/Right Keys to move the cursor to the start of the texts you want to copy and press OK key to confirm it. Then move the cursor to select the texts, which are highlighted in yellow. Press OK key at the end of the texts. The selected texts are cut.

5. Delete	Use Left/Right Keys to move the cursor to the start of the texts you want to copy and press OK key to confirm it. Then move the cursor to select the texts, which are highlighted in yellow. Press OK key at the end of the texts. The selected texts are deleted.
6. Phrase	You can choose to insert Chinese phrase, English phrase or Expressions.
7. Insert number	Insert numbers from the phone book.

Note:

1. Press the number key to select the corresponding function in the submenu directly. E.g.: if the submenu has pop up, press “7” to select an expression.
2. Press “C” to exit from the submenu.

SMS

Press **Left soft key** from idle display to view Main Menu, select to SMS and press **OK** to display SMS menu.

1 Write message

Select **“Write message”**. You can edit the message.

When text is OK, press **OK** key to enter **“Send to”** display. You can enter phone numbers manually with numeric keys.

Or

Press **Left Soft key** to select number from the phonebook.

Note:

1. If the message editing is interrupted by incoming calls, alarm clock, power keypress or power off, the entered texts will be saved temporarily. Next time you enter **“Create message”**, the phone will ask you if the last edit should be continued. If you select **“no”**, the last edit will be discarded.
2. You can edit messages on PC with UTILITIES software tool (sold separately), and download them to your phone. Also you can upload the messages from phone to PC.

2 Inbox

Select and press **OK** key to enter Inbox.

The messages in the Inbox are displayed. Press right/left key to view inbox. Use **Up/Down** key to select the

message, and then press **OK** key to view its detail. Use **Up/Down** key to scroll the texts.

When reading the message, you can:

Press **Send** key to dial the number directly.

Press **OK** key to reply a message. Please refer to “Create message” for detail.

Press Right Soft key to pop up the submenu. You can:

1. Reply: replay this message;
2. Forward: edit and forward this message;
3. Save to : save this message to phone or UIM card;
4. Get number: get the message’s phone number out and then edit it .
5. IP dial: make a IP call for this number.
6. Lock/unlock: lock or unlock the message;
7. Set as blacklist: you can set this number as call rejection or SMS rejection.
8. Delete: you can delete currently message; select some messages to delete, delete by number, or delete all.

3 Outbox

Select and press **OK** key to enter Outbox.

The messages in the Outbox are listed. Press Left/Right key to view CDMA outbox, GSM outbox, all outbox.

Use **Up/Down** key to select the message, and then press **OK** key to view its detail. Use **Up/Down** key to scroll the texts. Press Left/Right key to view border upon messages.

When reading the message, you can:

Press **OK** key to send this message.

Press **Right Soft** key to pop up the submenu.

4 Draft

Select and press **OK** key to enter Draft.

The messages in the Inbox are displayed. Use **Up/Down** key to select the message, and then press **OK** key to view its detail. Use **Up/Down** key to scroll the texts.

Press Left/Right key can view border upon message.

Press Right Soft key to pop up the submenu. You can:

1. Forward: edit and forward this message;
2. Save to : save this message to phone or UIM card.
3. Lock/unlock: lock or unlock the message;
4. Delete: you can delete currently message; select some messages to delete, delete by number, or delete all.

5 SMS settings

Select to enter SMS settings.

1. Prior memory area

You can select place the message in phone or UIM card.

2. Message validity

Let you select from One hour/12 hours/1 day/1 week/Maximum as the validity period for your sent message.

Your message is sent to the network first, and then forwarded to the recipient if his phone can be accessed.

Validity period is a time period, after which the network will delete the message automatically without sending it when the recipient's phone keeps inaccessible, for example powered off or with Inbox fulfilled.

3. Delivery report

Let you enable/disable Delivery report.

Delivery report is a confirming notification from the network when your message is sent to the recipient successfully.

Note:

This function depends on your local network and the functionality of your recipient's phone.

You can set enable or disable to display the delivery report.

4. Set reply number

You can set reply number.

6 Reserved message

Select and enter reserved message.

You can create messages, edit reserved SMS, or view failed reserved message.

When the reserved time has arrived, the phone will register to send the message .

7 Send report

Let you view the report of last multisend.

If one number is failed, will be displayed before it.

Press OK key to pop up a dialogue window to ask whether send it again.

Select “yes”, and press OK key to send it again.

8 Memory status

Select “**Memory status**” and press **OK** key to enter.

The current message quantities and remaining capacity of Phone, Inbox, Draft, Outbox and card are listed.

Profiles

Select and enter profiles.

The profiles include four types: General, Meeting, Outdoors, Mute.

Press left soft key to pop up the submenu. You can:

1. Start: You can choose one type and start the profile.
2. Personalize: You can set Call ringtone, Message tone, Reserved SMS tone, Alert tone and others according to you like.
3. Default: Resume the current profile to the default patten. Press "yes" to save the settings.

Phook

GETTING HELP

Customer support

Your service provider's customer support department may be accessible directly from your phone when you dial a number (check with your service provider). They can answer questions about your phone, phone bill, call coverage area, and specific features available to you, such as call forwarding.

Before requesting support, please try to reproduce and isolate the problem. When you contact the Customer Care Center, be ready to provide the following information:

- The name of your service provider.
- The actual error message or problem you are experiencing.
- The steps you took to reproduce the problem.
- The phone's electronic serial number (ESN).
- To find the ESN:
 - a) Remove the battery.
 - b) Locate the white label on the back of the phone.Your phone's ESN is located on the label.

SAR INFORMATION

THIS MODEL PHONE MEETS THE
GOVERNMENT'S REQUIREMENTS FOR
EXPOSURE TO RADIO WAVES.

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types C127 (FCC ID: SARHISENSEC127) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 1.16W/kg and when properly worn on the body is 0.66 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

FCC Warning Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications to this device that are not expressly approved by the manufacturer may void the user's authority to operate the equipment.
