SEVON TELECOM

Table of Contents

1. Warning

- Switch off your mobile phone when in an aircraft.
- The use of mobile phones in aircraft may endanger the operation of the aircraft due to electric wave interference with the aircraft equipment.
- Refrain from using your mobile phone in hospitals.
- · Do not use your mobile phone in places where explosive or inflammable liquids are located.
- Do not wipe your mobile phone with solvents or chemicals.
- · Avoid unusual vibrations or shocks, and store in a safe place when not in use.
- Do not hold or make contact with the antenna during a call.
- The use or storage of your mobile phone in extreme hot or cold temperatures will lower the performance of the mobile phone and shorten the service life of the battery.
- Do not use your mobile phone in hot and humid places. If your mobile phone gets wet in the rain or has liquid spilt on it, it may be difficult or impossible to repair.
- · Trying to dismantle your mobile phone may result in your disgualification from using free services.
- . When you use your mobile phone for the first time or reuse it after leaving it unused for a long period of time, fully charge the battery before use.

2. Components

Thank you for purchasing this product. Check whether your phone comes equipped with all the necessary components, as shown in the figure below. If the product is defective or there is a component missing, immediately contact the office where you bought our phone.

3-2 How to Use the Function Buttons

() These are Soft keys and are used to select the functions displayed on the lower part of LCD screen.

The left soft key button takes charge of commands shown in the left of the screen, and the right soft key takes charge of commands shown on the right of the screen. There is no fixed function assigned to each key since its function differs depending on the commands shown in the screen.

 $(\overleftarrow{\Delta})$ ($\underline{\bigcirc}$) Used to move the Menu options, to adjust the volume in the Adjust Volume screen, or to move the cursor in the screen to enter letters or numbers.

($\langle \overline{ \ } \rangle$)When you press key in standby mode, it shows the missed call.

(C) Used to make a call or to receive an incoming call.

()Delete characters from the display.

(/)Used to end a call, to cancel a function, and for Power On/Off.

 $(\underline{\neg}_{n})$ Can be used to check your voice mail if you hold down the key for a long time.

(<u>)</u>Hold it down to enter number with an international access code" + ".

()Used to convert to vibration mode.

(•)Used to make a voice memo recording at any time. Simply by pressing and holding the voice memo button.

([]) Used to adjust the keypad volume whist in standby mode, or to adjust the voice volume when making a call. Used to turn on the external LCD light when the folder is closed.

3-3 Icon Description

- Shows the intensity of the signal with the number of bars.
- Shows if the phone is diverted.
- Shows if the vibration mode is on.
- Shows that the phone can be used internationally in other countries.
- Shows when a call cannot currently be made.
 - Shows when the phone lock function is set.
- Shows when the alarm is set.
- Shows the current status of the battery with the number of bars.
- BI Shows if there is a new message or an unchecked message.
- Shows when the message box is full.
- Shows when there is a new voice message or an unchecked voice message.

4. Before Use

4-1 How to Fit and Remove the Battery and the SIM card

• How to Fit and Remove the Battery

How to Remove the Battery

Push the separation button up on the mobile phone in the direction of the arrow (1) and pull the battery out with one hand(2).

How to Fit the Battery

- 1. Fit the lower part of the battery in the groove on the lower part of the mobile phone(1).
- 2. Press the battery down in the direction of the arrow until you hear a click sound(2).

<How to Remove the Battery>

<How to Fit the Battery>

• How to Fit and Remove the SIM Card

How to Remove the SIM Card

Remove the battery from the mobile phone and push the separation button of the SIM card up to the right, then the SIM card will come out.

How to Fit the SIM Card

Insert the SIM card into the mobile phone and pull the separation button.

<How to Remove the SIM Card>

<How to Fit the SIM Card>

4-2 How to Charge the Battery

Connect the adapter to the bottom of your phone.

(The mobile phone is powered-on automatically when the charger is plugged-in)

- Connect the adapter to a standard AC wall outlet.
 (During charging, the message 'charging' will appear on the screen.)
- When charging is complete, remove the adapter from the phone by pushing both buttons

(When charging is complete, the status lamp changes color from red to a fluorescent color.)

* Note : Use the designated charger Only.

The non-approved chargers could result in a fire or injury through electrical shock and will invalidate all warranties given on this product.

4-3 Battery Charging Time and Average User Time

- Battery Charging Time
- Slim Battery : 1.5 hrs
- Standard Battery : 2 hrs

· Battery Talk-Time and Standby Time

Status	Slim Type	Standard Type
Talk-Time	199 mins	315 mins
Stand-by Time	76 hrs	129 hrs

SG5000

User time was measured based on the standby-time measured in our laboratory.

- User time may be shorter depending on the conditions, the degree to which the phone is receiving radio waves, button operation and charging method.
- If the battery is totally flat, it may take a few minutes before the charging indication appears on the display or any calls can be made.
- Warning : Before you use the phone for the first time, it is important that you fully(for more than 12hours) charge the battery.

4-4 How to Effectively Use the Battery

- Use the designated charger only. Never use other chargers as they may damage the battery.
- Do not put the battery close to firearms or try to take it apart without qualified assistance.

Risk of explosion.

• Do not drop your mobile phone.

Impact on or dropping your phone may cause problems with the electric cell inside the battery pack, and shorten the battery life.

- Main body of the mobile phone or the battery has an increased charging efficiency at room temperature.
- The mobile phone and the battery have an increased efficiency at 5~45 .
- Always store the battery at 5~45 .

If you put the battery in a car with the door closed in the summer or in an exceptionally hot or cold place, the battery capacity will be reduced and the service life will be shortened.

5. Getting Started

5-1 Power On

- Open the flip cover and press the Power Key () for more than 2 seconds.

Press long the side button to reject a call with not a open folder. If you remove the earphone on the call (with not a open folder), the call will be disconnected.

7. Main Menu

7-1 SIM Toolkit

 Sewon mobile phones support the SIM Toolkit function required by most common applications.

7-1-1 Setup Menu

 Please insert the SIM card and start your mobile phone. If the SIM card comes with a SIM Toolkit menu, a new entry is added in the main menu as" SIM Tool Kit "

7-1-2 Menu Selection/Select Item

• The SIM Toolkit command" Menu Selection "will display SIM card menu items in the same format as the other phone menus.

7-1-3 Display Text

 The" Display Text "command can be executed by displaying an information screen with the text contained in the command.
 Pressing any key will remove the screen.
 This command will be ignored if the phone is in a menu (Except for the SIM Toolkit menu)

7-1-4 Call Control

 If call control is requested by the SIM card, all user entered outgoing calls, SMS and SS/USSD strings are passed to the SIM card and not executed directly. The SIM can modify the user 's request to any other - in the form of a Set-up call/send SMS/send SS-string command or ignore the request

7-1-5 Set Up Call

 The Set-up Call command will initiate a call. The user has no control over the number, SMS or string sent and will not see its contents however, the user will see the usual set-up and inprogress screens associated with the call, SMS or string.
 This command will be ignored if the phone is in a menu (except for the SIM Toolkit Menu)

7-1-6 Send Short Message

 The" Send Short Message "function will send the message supplied by the SIM to the network. The user is not informed of this operation as it is taking place.

7-1-7 Send SS

 The "Send SS "command will send the SS or USSD string specified in the command to the network. Again, the user is not informed of this operation as it is taking place.

7-1-8 Get Inkey

 The" Get Inkey "command causes an entry screen to be opened, in the same manner as any other editor in the phone, with a prompt specified in the command. The phone then forwards the next key pressed to the SIM card, and returns to its previous screen. This command will be ignored if the phone is in a menu (except for the SIM Toolkit Menu)

7-1-9 Get Input

 The" Get Input "command also opens an entry screen with a prompt specified in the command. However for this command a complete string can be entered. The string is only forwarded to the SIM when the left soft-key" OK "is pressed.

This command will be ignored if the phone is in a menu (except for the SIM Toolkit menu)

7-1-10 Play Tone

 The" Play Tone "command will play a short beep and if any information string is supplied in the command it will open an information screen with the specified string. The string will remain on the display until a key is pressed or until there is a period of inactivity and it times out.

This command will be executed from any phone state (including menus etc).

However, any information display will be delayed until the phone returns to the idle screen.

7-1-11 Download

 The download command transfers data to the SIM without indication to the user.

7-2 Sounds

 This menu set the Sound mode. (Ring Mode, Select Melody, Voice Volume Etc.)

3-5 How to Enter English Characters

You can compose a message using the numeric keys from 0 to 9, and the (/*-/)key.

Press a key quickly several times to check that one key shows different characters for each press.

Uppercase Mode is the default mode in this phone. Press the (عرب) key to change it to Lowercase Mode.

First, press the (<u>2</u>)key.

Press once to produce character A, twice to produce character B, and three times to produce character C.

(Since Uppercase Mode is set by default, you will see them in upper case.)

Press the (2) and then the (2) key.

Press once to produce character a, twice to produce character b, and three times to produce character c.

(It changes to Lowercase Mode when you press (\underline{K})), so you can see that Lowercase Mode characters are displayed)

Try out other keys.

Now, try making a sentence.

Compose the sentence below.

< Example > Hello

1. Press the following buttons to compose this example sentence. 2. Hello $% \left({{{\rm{B}}_{{\rm{B}}}} \right)$

3-6 How to Enter English Characters (T9 Type)

This phone supports the T9 type for English input type. You can easily and conveniently compose an English message with the T9 type.

As you see in the figure above, each key is assigned 3 \sim 4 English characters.

The T9 type is not a type which directly finds and enters the characters, but is a type which mixes the characters in the phone itself and shows them on the screen.

Then, let 's make a word.

- 1. Let 's make the sentence" I love you ".
- First, press the (<u>____</u>)button to display upper case I. (Press the(<u>___</u>)button to convert upper case to lower case, and vice versa, as in the normal way of entering characters.)
- 3. Press the (Aur)button, which the character I is assigned to.
- 4. Then, the character I will be displayed on the screen. (The reason why the character I comes first, despite the fact that it is in the third place on the number 4, is that character I can be used as one word.)
- 5. Then, press the ()) button to enter a space.
- 6. Press the $(5 \times)$ button to bring up the I character again.
- 7. Successively press the $(\underline{3})$ button, $(\underline{8})$ button, and $(\underline{3})$ button in that order.
- 8. Then, press the () button to enter a space.
- 9. Press the () button, () button, and () button in that order.
- 10. Press the buttons in the order described, and check the screen to see the process where the phone makes the word by itself.

3-7 How to Enter Chinese Characters

Stroke Mode

T9 characters are used to enter Chinese characters. Enter Chinese characters using 5 keys and ? Keys as shown in the below table.

SG5000

The phone will search for characters with the same number of strokes as the number of. When you press the ? Key once, it will search for characters starting with 1 stroke. If you press the ? Key two times, it will search for characters starting with 2 strokes. Now, let 's enter the characters, referring to the table shown above.

Fox example, to type the phrase

Enter Strokes : At the beginning of a new message (press and hold clear key () the previous message if necessary), press the keys corresponding to the character's component strokes. Strokes are displayed in the Keystroke Area. Component and character choices appear under numbers in the Character List. In a new message, press the keys (Tem) (0...)

· Select a Component

press (1) to select the first component of "jie."

Pinyin Mode

In Pinyin, the pronunciation of Chinese characters is translated using the Roman alphabet. T9 Chinese Text Input enables you to enter Pinyin syllables using the telephone keypad without multitapping. As you type, T9 text input compares your key presses to the database and identifies possible Pinyin syllables and provides a list of the potential character candidates from which the desired character be easily selected.

- This deletes all messages at once.
- Use the Navigation button(() to select Delete All and press the left soft button.

The message" Delete all? "will appear on the screen. Press the right soft button (Back) to return to the message

submenu.

Press the left soft button (OK) to delete the messages saved in the SIM card.

7-4-6 Options

- This menu sets the text receiving/sending function.
- Use the Navigation button to select the option and press the left soft button.

SG5000

6-1. Service Center

 An SMS Center Number is required to send messages. Please ask your service provider for this service.

6-2. Validity Period

 This sets the duration of any messages that are stored at the Service center. This time period can be adjusted on an hourly, daily, weekly, monthly and even yearly basis. After the validity period, the Service center deletes the messages.

6-3. Message Type

 This sets the message type. The available choices are; E-mail, Fax Group3, Fax Group4, Voice, ERMES Pager, Other Pager and GSM mobile. After selecting the message type, it is then converted to the appropriate network message type.

7-4-7 Broadcast

- · Broadcast: used when receiving information from your service provider by SMS.
- Use the Navigation button to select Broadcast and press the left soft button(Select).

7-1. Status

• This sets Reception to either On or Off. When the reception mode is on, broadcast message can be received. If the reception mode is off, broadcast messages cannot be received. In this mode, the battery duration will last longer. The default mode for this is with reception off.

7-2. Read

. This displays the title of the most recent received messages. Use the Navigation button to select the message then press the select key to view the entire message.

7-3. New

 This function stores new three digit channels. Maximum SIM storage only allows 20 channels to be stored.

7-4. List

 This displays any registered channels. Select channels then press the left soft button to delete the broadcast topics.

7-5 Scheduler

- This menu set SCHEDULER. To Do List. Reminder. Reserved Call.
- The Scheduler helps you to keep track of reminders, calls that you need to make. To do list or Event.
- Your phone alarm rings or call when you set for Event.

Scheduled dates will be shown darker than

the other dates without any schedules.

 Select" 4.SCHEDULE "Menu from the Main Menu and press the left soft button to display the following submenu.

SG5000

7-8-1 Phone Lock

- This function prevents access to the phone by any unauthorized users. A 4-8 digit password must be entered in order to initiate mobile phone functionality.
- Select Phone Lock from the security submenu and press the left soft key.

Back

Select

1-1. Activate

• Activates the Phone Lock function.

1-2. Deactivate

· Deactivates the Phone Lock function.

1-3. Status

• Displays the current status of the Phone Lock (activated or deactivated).

1-4. Change P/W

· Changes the Phone Lock password.

Warning:

1. You must know the password in order to use the Phone Lock functions.

Make sure you remember the password, since you cannot use these functions without a password.

- 2. The default of the Phone Password is "0000".
- 3. Avoid selecting a number similar to an Emergency call number when you change the Phone Lock number.
- 4. If you enter the incorrect password for three times consecutively, the message" Phone Lock Blocked Pernan "will be displayed. Should this happen the phone will not be able to perform any functions.

7-8-2 PIN

- This function prevents access by others. A 4~8 digit password must be entered in order to initiate the mobile phone.
- If you enter your PIN incorrectly three times in a row, the SIM card is blocked.

- If your SIM card is blocked, PIN blocked appears.
- If you want unblock your SIM card, you must enter PUK number.
- Then, you enter a new 4~8 PIN.
- Once you have entered a new PIN, you are asked to confirm it by entering it again.

Select PIN from the Security submenu and press the left soft button

2-1.Activate

• This sets the PIN mode. When activated, the massage" enter PIN "will appear when the power is turned on.

2-2. Deactivate

 This deactivates the PIN mode. When deactivated, no message will appear when the power is turned on.

2-3. Status

• This shows the current status of the PIN mode.

2-4. Change PIN

This menu is to change PIN.
 Enter the current PIN and press the left soft button.
 Enter the new PIN and then press the left soft button. The PIN has now been changed.

7-8-3 Change PIN2

- This changes the PIN2.
- Select PIN2 from the Security submenu and press the left soft button.

Enter the current PIN2 and press the left soft button. Enter the new PIN2 and then press the left soft button. The PIN2 has now been changed.

Warning:

You may not be able to use some of the functions in the menu without the correct PIN2. Please remember your PIN2.

7-8-4 Call Barring

- This restricts any calls made by the user.
- Select Call Barring from the Security submenu and press the left soft button.
- If you want to use this service, you need Password which service provider provided.
- 4-1. All Outgoing
- Prohibits any outgoing calls.

4-2. Inter. Calls

· Prohibits any international calls.

4-3. Inter. But Home

 When making calls from overseas, calls can only be made to your home country and the local numbers.

4-4. All Incoming

• Prohibits any incoming calls.

4-5. When Roam

• When the user is roaming, out going calls can be made but incoming calls are prohibited.

These menus have the following submenu: On : Activates the selected menu.

Off : Deactivates the selected menu.

Status : Displays the current status of the menu.

4-6. Cancel All

• When Deactivates any call barring that have been set.

4-7. Change P/W

This changes the Call Barring Password provided by the service provider.

A 4-digit Barring Password is required to activate/deactivate the Call barring function. The service provider will provide the password for you, if you purchase the service.

The call barring service may not be available for some networks.

7-8-5 Fixed Dial No.

Details Add New Entry

Edit Send Message

Delete

7-11-7 Service No.

 Service No. : This menu shows the list of Services Dialing numbers (SDN) assigned by your network operator/service provider in the SIM card. The user can use these telephone numbers to make outgoing calls.

7-12 Solving Problems

 Check these points to ascertain if the phone is broken or not. This way, you can prevent unnecessary wastage of time and money.

Symptoms		How to Solve the Problem
	SIM Invalid	Check whether you have inserted the SIM card in the phone, and whether you have inserted it correctly.
	Enter PIN	PIN is set by the user to prevent others from using this phone. In this case, enter your PIN.
When this message appears on the screen	Enter PUK	This message appears when the PIN is incorrectly entered three times in a row. At this time, enter the PUK you received when you purchased the SIM card in order to use your phone again. If the PUK is incorrectly entered more than 10 times, your SIM card will be permanently blocked, and you need to purchase a new SIM card.
	Message "Searching" is displayed along with "No Network" or % mark.	 When this happens in a service area, turn the power off wait 2-3 minutes, and then turn the power on again. If you are passing through a tunnel or are in a densely built up area, the network signal may be weakened or disconnected. In this case, move to another location and try again. If this continues for some time without reason, contact the service center nearest you.
You cannot make a call even though you have entered the number and pressed the Send button		 Check whether you are in a service area. (If you are not in a service area, will be displayed on the screen.) Check whether you have set Outgoing Calls to be barred. If this function is set, you cannot make a call. (You can check All Outgoing menu in the Call Barring menu of the Security menu.)
No incoming calls from others		 Check whether you are in a service area. (If you are not in a service area, will be displayed on the screen.) Check whether you have set Incoming Calls to be barred. If this function is set, you cannot receive calls. (You can check All Incoming menu in the Call Barring menu of the Security menu)

7-13 Emergency Calls

- This is a function that the user can use when in an emergency or dangerous situation. The user can dial
 "112 "wherever they are to make an emergency call.
- Even if your phone is receiving a travelling service in another country, when you dial" 112 "the network will automatically connect you to the emergency service of that country.
- You can make an emergency call without entering the phone password, even when the Phone Lock is set on your phone.
- You can use the Emergency Call function without entering the PIN even if the PIN is activated on your phone. In this case, when you enter Emergency number (' 112 '), call will appear in the left soft button. (If it is not an Emergency Call, cor will appear.)
- You can use this function even if your phone is in SIM Invalid status (No SIM card). When you power on your phone," SOS "is assigned in the left soft key. If you press Emergency Call Number and press the right soft key (SOS), (Cell) will appear in the left soft key.
- You can use this function even if there is no registered network but other networks exist.
- You can use this function even if your phone is currently searching for a registered network.
- You can make an emergency call even if the Call Barring or Fixed Dial No. function is set on your phone.

7-14 Terms

- GSM (Global System for Mobile Communication) International standard on cellular communication which guarantees compatibility between various network operators. GSM covers many countries in the world, including most European countries.
- Line identification Services (Caller ID) This function displays or blocks the phone number of callers.
- PIN (Personal Identification Number)

A code that prevents others from accessing the users 'phone, provided by the service provider along with the SIM card. The user can change the PIN after receiving it from the service provider.

SG5000

• PUK (PIN Unblocking Key)

An 8 digit security code which unblocks the phone when the PIN code has been entered incorrectly three times in a row. It is provided by the service provider along with the SIM card. When PUK is entered incorrectly more than 10 times in a row, the SIM is permanently blocked.

PIN2

PIN2 is a code to block others from accessing the personal information the user has entered. This code is requested when FDN is set. Like PIN, the user can change this after receiving it from the service provider. However, not all SIM cards have a PIN2.

PUK2 is an 8 bit code to unblock the phone when the PIN2 has been entered incorrectly three times in a row (like PUK). It is provided by the service provider when you purchase SIM card.

• FDN (Fixed Dial Number)

This function prohibits the forwarding of messages or outgoing calls except to the numbers that are already designated. When this function is set, the user will be prompted to enter PIN2 when he uses a function affected by FDN.

Traveling

This function allows the user to use the phone in other countries except the home country. Of course, since this service is not provided in all countries, please contact the service provider in advance for details on which countries this service is available in.

Dual Band

This function allows the user to operate all GSM networks and DCS. Your phone will automatically use the network with the strongest signal, and the network can be converted while you are making a call if it is within the networks of the same operator.

Service Center

This number is the number that the user needs to enter in the phone to receive a message service. You cannot receive this service without this number. Contact your service provider to find out this number.

• SIM (Subscriber Identification Module)

This is a card that contains a chip which contains all the information (personal data of the subscriber, network and memory information) required to operate the phone. However, the storage capacity may differ for each SIM card.

SMS (Short Message Service)

This is a short message (below 160 characters) service between subscribers.

Soft Buttons

2 () buttons on the phone and which change depending on the function currently used. Their functions are indicated by messages displayed on the right and left lower parts of screen.
